

TIME TO
HAVE YOUR OWN
3D PRINTER!

Mbot CUBE Kits Version——The most perfect CUBE in the history

Not only the risk of the damage en route will no longer exist, but also it is even the crystallization of continuing perfection of design and the surpass of ourself of Mbot Series in the past two years.

We elevate the speed into 100mm/s, in comparison to other brands of 3d printer, the efficiency elevated up to 50%, saving you more time to do creation.

We are thriving to promote printing quality, and always insist to use the key parts from big factories in western countries, because we should let our customers really enjoy the value of 3D printing. After all, we only do something related in quality.

Fully new design for platform supporter, it is in the same time to promote the stability, and even to elevate the precision of the printing.

Detachable platform is made of more smooth and good quality surface material, making the disassemble and assemble process easier.

The tool cabinet with all necessary tools, which is our exclusively perfect equipment, as soon as you open the box, you can do it straightly and you can do the installation of a 3D printer fully by yourself, just enjoy the sense of achievement.
